

# URBAN WOOD: AN UNDERAPPRECIATED RESOURCE

*A workshop to begin linking sources of urban logs with sawmills, processors, woodworkers, and end users*

November 14, 2017  
8:00 am – 4:00 pm

Heuser Park  
694 West Beidler Rd  
King of Prussia, PA 19406

\$20 pre-registration  
required

CEUs: ISA 7 and SAF 7.5

Shade trees grace our homes and communities, while providing countless ecological, social, and economic benefits to our lives. But when a shade tree comes down, the wood that results is often treated as waste, rather than as a valuable resource. Sound logs are ground to mulch at a considerable cost, when the wood could produce beautiful and useful products. Join us for a workshop to look at the possibilities urban wood offers, and to help build an urban wood network.

## Topics:

- Urban Wood Networks elsewhere in the country
- Properties of various wood species
- Bucking for optimum use
- Portable mill demonstration
- Dry kiln construction and operation demonstration
- Biochar making demonstration
- Cross laminated timbers
- Local urban wood users

## Who should attend?

Arborists  
Tree Services  
Public Works and Parks Departments  
Sawmill owners  
Woodworkers  
Craftsmen  
Artists  
Architects  
Educators  
And interested others!
